

Kit-as-a-Service Deployment

GJ Kits-as-a-Service (KaaS) platforms typically go-live 8-10 weeks after a SOW is signed. The timeline depends on the application portfolio, datacenter location and required testing.

Domestic (USA) Timeline

1. Launch Meeting usually occurs within 10 business days. We can speed things up if needed.
 2. May be extended to meet client-specific testing requirements (InfoSec)
 3. May be extended to meet end user testing needs

Kit-as-a-Service Deployment

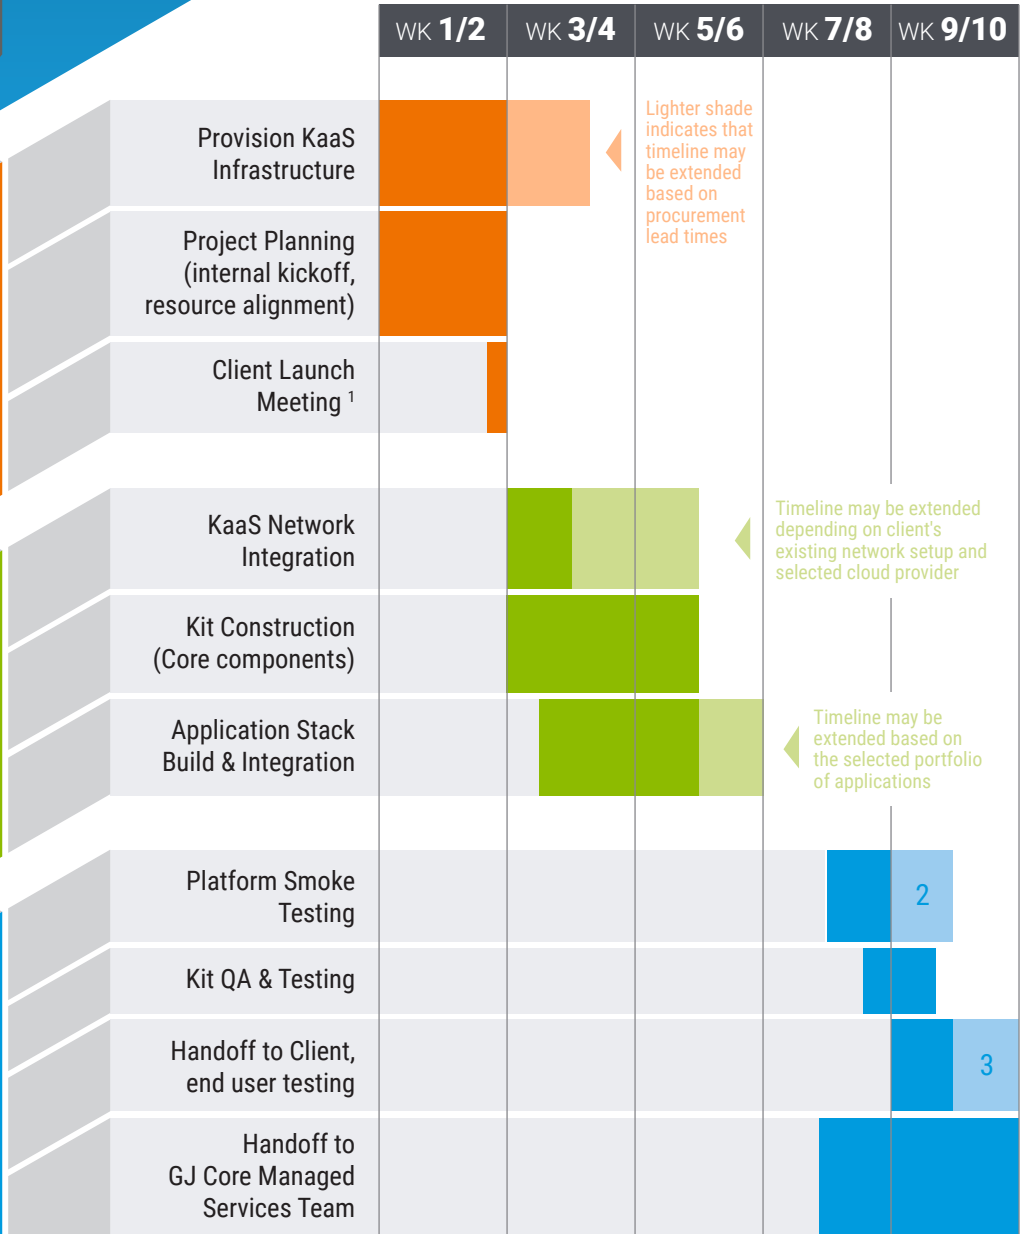

GJ Kits-as-a-Service (KaaS) platforms typically go-live 8-10 weeks after a SOW is signed. The timeline depends on the application portfolio, datacenter location and required testing.

Note: KaaS availability is based on select cloud provider datacenter locations

International Timeline

1. Launch Meeting usually occurs within 10 business days. We can speed things up if needed.
 2. May be extended to meet client-specific testing requirements (InfoSec)
 3. May be extended to meet end user testing needs
